## Perfect Blend Fertilizer with 14 Essential Elements

**80% Natural Organic Based, 20% Integrated Minerals**

### Sustains beautiful lawns and restores Low Soil Organic Matter Levels In Worn-Out Lawns.

Even the best cared for lawns will become depleted of the valuable nutrients found in soil organic matter after repeated use of synthetic fertilizers that do not contain organic nutrients. Perfect Blend will sustain beautiful lawns and will provide valuable organic components specially formulated to restore and rejuvenate lawns that have been over-fertilized with synthetic fertilizers.

### Proprietary Process!

Perfect Blend fertilizers are made using a proprietary process that produces a high quality Complex Nutrition Enabling Fertilizer (CNEF™). CNEF™ provides high quality complex nutrition to soil microbes that are responsible for breaking down minerals for plants while helping to maintain a balanced pH in your soil.

### Now with Mycorrhizal Spore Inoculants!

Mycorrhizal is a valuable beneficial fungus, not hazardous to humans, that is of great benefit to most turf grasses, plant, shrubs, and trees. Perfect Blend fertilizer is inoculated with a blend of three dormant mycorrhizal spore species, *Glomus intraradices*, *G. aggregatum* and *G. mosseae* at approximately 2.58 propagules per total. 100% mycorrhizal strength guaranteed for two years after bag crimp date if product is kept in a dry location at less than 110° F. Fertilizer nutrient values expire after seven years.

### LOW LEACH – SAFE FOR APPLICATIONS NEAR STREAMS & LAKES!

Perfect Blend is a low leach fertilizer that can be safely applied close to sensitive lakes and streams. The majority of Perfect Blend nutrients enter the soil as a tea which is ingested by soil microbes and converted into humic substances.

### A SAFE PRODUCT!

Virtually pathogen free, Perfect Blend usually does not appeal to pets. Nor, does it usually attract disease vectors such as flies or rats. The high organic percentages render mineral ingredient levels safe, even if accidentally ingested.

### DIRECTIONS FOR KIDS & PETS SAFE LAWN APPLICATIONS:

**On established lawns** apply at the rate of 20 lbs for every 2,500 square feet. Water well and wait overnight before allowing children and pets onto the fertilized area.

**New Lawns** will benefit from a heavy base application of Perfect Blend 8-5-5 before sod is laid. Apply at the rate of 20 lbs per 1,000 square feet before placing sod.

**Existing Lawns** that have been well cared for and routinely fertilized will benefit from an application of 20 lbs per 2,500 square feet approximately every 45 days.

**Older Lawns, Bare Spots, or Reseeded Areas** will benefit from an application of 20 lbs per 1,000 square feet.

### NON-LAWN APPLICATIONS:

Perfect Blend is a mild organic based fertilizer that may be applied on flowers, shrubs, trees and other non-lawn applications. It may also be used in vegetable gardens and house plants. Apply 2 cups around and in the hole of a new shrub or tree avoiding direct contact with plant roots. For containers mix two tablespoons for every quart of potting soil.
